

Mr. Page brings over 10 years of classroom experience to NCVPS/Learn and Earn Online. Mr. Page served 10 years as a high school Math teacher in Rockingham and Wake Counties. Mr. Page was on the cutting edge of technology, combining online supplemental instruction to his face-to-face classes. His ultimate goal in teaching was to find innovative tools that both engaged and excited learners. Mr. Page saw the importance of taking each student where he was academically and customizing instruction based on that student's needs.

Because of his innovative approach to student learning, Mr. Page worked on the ground level of course development for the NCVPS Credit Recovery program. He was part of the first course development team who worked to implement the program's unique vision and mission. Mr. Page then taught during the piloting of the Credit Recovery program and served as the first Research Development and Innovation consultant for Credit Recovery. In February of 2009, Mr. Page transitioned into the roll of NCVPS Credit Recovery Specialist. His primary duties are working with the continual revision and monitoring of the Credit Recovery courses as we put into practice our belief of continuous improvement for our mastery learning model. He is also responsible for handling Blackboard support for teachers and schools regarding the Credit Recovery courses.

Mr. Page holds a Bachelor of Science in Mathematics Education from NC State University and a Master of Science in Mathematics Education from NC A&T State University.

His vision is for all students, regardless of zip code, to be able to receive a quality education online with 21st Century Tools. Mr. Page also believes that in receiving a quality online education, that all students should be have access to curriculum that is both engaging and is presented with interactive tools and activities.
